Project Information (EN)

ATLAS OF QUEER ANATOMY

The standards in classical medical anatomy cause discrimination and create serious problems in (access to) clinical treatments. with the Atlas of Queer Anatomy, designer Kuang-Yi Ku and medical professor Henry de Vries challenge Western, white and heteronormative dominance in anatomical education. The visualisations offer an ironic reflection on the still widely used textbook ‘Atlas of Human Anatomy’, (Frank H. Netter, 1957). Kuang-Yi Ku and Henry de Vries want to increase the inclusiveness of anatomy within and outside medicine. The project includes workshops in which young doctors and creatives are invited to make their own queer anatomical collages, which are then incorporated into the atlas.

Projectinformatie (NL)

ATLAS OF QUEER ANATOMY

De normen in de klassieke medische anatomie veroorzaken discriminatie en veroorzaken ernstige problemen bij (toegang tot) klinische behandelingen. met de Atlas of Queer Anatomy, ontwerper Kuang-Yi Ku en medisch professor Henry de Vries daag de westerse, blanke en heteronormatieve dominantie in anatomisch onderwijs uit. De visualisaties bieden een ironische reflectie op het nog steeds veelgebruikte handboek ‘Atlas of Human Anatomy’, (Frank H. Netter, 1957). Kuang-Yi Ku en Henry de Vries willen de inclusiviteit van anatomie binnen en buiten de geneeskunde vergroten. Het project omvat workshops waarin jonge artsen en creatieven worden uitgenodigd om hun eigen queer anatomische te maken collages, die vervolgens in de atlas worden verwerkt.
