

Binari

Binari is the perfect fusion of a side table and a lamp.

Binari is de perfecte combinatie van een bijzettafel en een lamp.

Hosted by: Isabel Quiroga

Project Information (EN)

Binari is the perfect fusion of a side table and a lamp. The built-in tabletop provides a convenient surface for your everyday essentials, whether it's a book, a cup of tea, or your favorite plant. It is covered with sustainable furniture linoleum by Forbo, giving it a durable and elegant finish. Binari stands out with its striking color combinations, adding a vibrant touch that makes it a bold and inviting feature in any interior. Its modular design allows for a variety of finishes, offering the opportunity to explore color combinations that result in unique pieces tailored to any project. Lichtlab is a Dutch lighting manufacturer where every lamp is carefully crafted by hand in their own workshop in the Netherlands.

Place Binari in your entryway, next to the sofa, or by your bed, wherever you need both light and a table in one smart design. Equipped with a dimmer, it lets you set the mood with adjustable lighting.
