

An Olfactory Biopolitics Nairobi

How smell is a powerful tool in design and behavioral economics allowing for unique and serendipitous design interventions.

How smell is a powerful tool in design and behavioral economics allowing for unique and serendipitous design interventions.

Project Information (EN)

This extended research project examined how the use of smell as a means of control or behavior modification comes under the notion of biopolitics. I produced a series of videos, they each act as documentation and a meditation on the potential use of smell

Projectinformatie (NL)
