

Aflot

Coastal Protection

Coastal Protection

Project Information (EN)

The floating structure is fixed to the ground by cables and anchors to reduce the impact of erosion on ecosystems and communities. The arrangement of modules, which remind a little of mangroves roots or even coral reefs, diffuses the current before it hit

Projectinformatie (NL)

The floating structure is fixed to the ground by cables and anchors to reduce the impact of erosion on ecosystems and communities. The arrangement of modules, which remind a little of mangroves roots or even coral reefs, diffuses the current before it hit
