

The ceramic house

Welcome to the world of Harm and Elke, have a look inside their studio.

Hosted by: Studio Harm en Elke

Project Information (EN)

|

Though presented in many beautiful muted colors, the designs have a calm appearance. Objects are always distilled down to the essence, enhancing the pure expression of the material. During DDW 2021 new objects will be highlighted in the studio. One of the featured projects will be a new collection of lamps. Besides that there will be plenty of room to have a look at the processes involved in making this unique collection.

Projectinformatie (NL)
