

Cornette by Dutch Nuns

Hosted by: DutchNuns

Project Information (EN)

Authentic & Playful Garden Lighting.

The starting point for this outdoor design lamp is based on the existing poles in a home garden. The assignment was to create a lamp that could be attached on these poles to give them a new life. During the folding process of steel plates we came up with a shape that reminded us of nun hoods, the Cornette. This unique shape can be slid around a wooden pole in different ways and directions. It is also possible to attach the lamp to the wall. The Cornette simply lights up your garden in a very playful way.
