

Commutatio

Change due to exchange

Commutatio

Hosted by: Arne Hellwege - Minerva Groningen

Project Information (EN)

Inspired by religious rituals infused with contemporary mediums lead me to design “Commutatio”. The latin word stands for both “change” and “exchange”. The word origin suggests a dependency of both words- there is no change without exchange and vice versa. The designed system allows tonal expression/ exchange through organ pipes between at least 2 players. The visitor's analoge creation can be spectated in a digital live-render visualizing the sound. With the help of my graduation project I am digesting experienced societal changes such as the Covid-19 pandemic. Focusing on the dependency on real human interaction and following finding a way to enhance the interaction towards the feeling of connectivity or resonance. I want to evoke resonance.
