

Post Industrial Crafts

Exploring the intersection of crafts with digital fabrication, PIC presents a family of sustainable objects and furniture.

Abnormal Couch

Hosted by: Post Industrial Crafts

Project Information (EN)

Abnormal Couch

A contemporary, edgy, embroidery work of art, the Abnormal Couch is a 3D printed sculpture that can be sat on. Based on the classic Chesterfield Sofa, the Abnormal Couch’s complex geometry is adorned by a refined parametric weaving pattern. The couch provides a full sculptural effect

The Cigarette Lanterns

The Cigarette Lanterns are very distinctive lamps despite their minimalistic design. The translucent recycled polycarbonate cylinder irradiates a soft ambient light that enriches your space. Unbreakable, and easy to fit anywhere, it will better the ambiance of your space. Its brass legs are adjustable in case your ground is not even. Many colors and textures are available on demand.

Tripod Lamps

The Tripod lamps are rugged three-legged companions that can follow you everywhere. The large ones are designed to be carried on terraces to lit the ground without forbidding you to look at the landscape. They are rainproof and shockproof, and their handle helps you take them anywhere. Robust and charming, made of 100% recycled plastics, they are one of our best sellers.
