

Bench 01 - Woven Bench

A contemporary adaptation of the traditional Danish Weave design that combines modern materials with classic woodworking techniques.

Een eigentijdse bewerking van het traditionele Deense Weven dat moderne materialen combineert met klassieke houtbewerkingstechnieken.

Hosted by: Nature Boy Carpentry

Project Information (EN)

Comfort & Colour

Danish weaving is a timeless furniture-making technique, but the paper cord traditionally used in its construction comes with visual and practical limitations. Bench 01 uses sustainable cotton macrame cord to provide comfort and flexibility in the design process, allowing the customer to customise the bench with a limitless colour palette.

Production

Every bench is hand-crafted in the Amsterdam workshop using a combination of classic woodworking techniques, weaving looms, and custom jigs. This means Bench 01 has a fast production time, without compromising on the quality you would expect from a handcrafted piece.

Projectinformatie (NL)

Comfort & Kleur

Deense Weeftechniek is een tijdloze methode in de meubelmakerij, maar het papierkoord dat traditioneel wordt gebruikt, brengt visuele en praktische beperkingen met zich mee. Bench 01 maakt gebruik van duurzaam katoenen macramékoord om comfort en flexibiliteit te bieden in het ontwerpproces, waardoor de klant de bank kan aanpassen met een oneindig kleurenpalet.
