

Artificial Landscapes

A human & AI collaborative art expo, imagined by AI through the lens of nature.
Een samenwerking tussen mens en AI in de vorm van een kunstexpo, verbeeld door AI door de lens van de natuur.

Hosted by: Jelle Kok

Project Information (EN)

/imagine: a creation myth for AI

Artificial Landscapes tells a futuristic and ancient story about creation in times of AI, imagined and told by AI itself. I asked ChatGPT to give a modern twist to various creation concepts from nature and with this texts i used Midjourney to imagine and visualize it. A revaluation of human creativity and at the same time using the potential that AI offers to achieve productions that were previously impossible.

/imagine: a combined visual language

This results in a mythical collage series designed by a human and AI (Midjourney and ChatGPT) collaboration that strives for a visual balance between nature and technology. The landscapes form a futuristic vision for a world where AI and technology exists besides and in harmony with nature. Book photography: Chloe Alyshea

Projectinformatie (NL)

/imagine: creatieverhaal voor AI

Artificial Landscapes tells a futuristic and ancient story about creation in times of AI, imagined and told by AI itself. I asked ChatGPT to give a modern twist to various creation concepts from nature and with this texts i used Midjourney to imagine and visualize it. A revaluation of human creativity and at the same time using the potential that AI offers to achieve productions that were previously impossible.

/imagine: een gecombineerde visuele taal

This results in a mythical collage series designed by a human and AI (Midjourney and ChatGPT) collaboration that strives for a visual balance between nature and technology. The landscapes form a futuristic vision for a world where AI and technology exists besides and in harmony with nature. Book photography: Chloe Alyshea
