

Inmergo

Introducing Fluid Conduction Sound Transmission technology.
Introductie van Fluid Conduction Sound Transmission-technologie.

Hosted by: Rocco Giovannoni

Project Information (EN)

Bone conduction has recently become popular thanks to devices which let the user hear outer sounds while listening to music, at the expense of sound quality. I believe these are wasting an opportunity for a technology that has the potential of improvin

Projectinformatie (NL)

Botgeleiding is onlangs populair geworden dankzij apparaten die de gebruiker uitzonderlijke geluiden laten horen tijdens het luisteren naar muziek, ten koste van de geluidskwaliteit. Ik geloof dat deze een kans verspillen voor een technologie die het
