

Echo

Transforming digital memories into legacies that live on
Digitale momenten transformeren tot een blijvende erfenis

Hosted by: Elena, Geetanjali, Sebastian .

Project Information (EN)

What happens with our digital lives when we pass away?

As we spend more of our lives online, our digital presence outlives us. After death, this data remains and is often unmanaged and complex for loved ones. The rise of “grief tech” offers ways to memorialise and cope through AI, but raises concerns around privacy, consent, and ethics.

A hybrid ritual

Echo offers a thoughtful way to curate and preserve your digital legacy. Through a reflective process, it helps you decide what to keep, delete, or protect in your Legacy Key.

Projectinformatie (NL)

Wat gebeurt er met ons digitale leven als we overlijden?

As more of life moves online, our digital presence often outlives us — leaving behind unmanaged data that can be overwhelming for loved ones. While new “grief tech” tools try to offer comfort, they also raise difficult questions about privacy, consent, and ethics.

Een hybride ritueel

Echo biedt een doordachte manier om je digitale nalatenschap vorm te geven en te bewaren. Via een reflectief proces helpt het je beslissen wat je wilt behouden, verwijderen of veilig opslaan in je Legacy Key.
