

The Tyre Collective

Saving our air from tyre wear

Onze lucht redden van bandenslijtage

Hosted by: The Tyre Collective

Project Information (EN)

We all know tyres wear down but have you ever considered where it goes? Today, half a million tons of tyre particles are produced annually in Europe. These particles become airborne, accounting for up to 50% of vehicle particulate emissions, and are t

Projectinformatie (NL)

Wij weten allemaal dat banden slijten, maar heb je ooit nagedacht over waar het naartoe gaat? In Europa wordt jaarlijks een half miljoen ton aan band deeltjes geproduceerd. Deze deeltjes komen in de lucht terecht, tellen zo'n 50% van de emissies van voer
