

Be Your Own Robot

Will we live our life as a robot in the near future, or will we find ways to control the algorithms that determine what we do?

Gaan we in de nabije toekomst door het leven als robot, of kunnen we zelf de algoritmes vormgeven die bepalen wat we doen?

Hosted by: Sander Veenhof

Project Information (EN)

In many areas of our life it's software that leads the way. What we encounter on the internet, who and what comes our way, it's all defined by algorithms. And because the digital world is becoming more and more intertwined with our physical reality thanks

Projectinformatie (NL)

Op steeds meer manieren bepaalt software hoe ons leven eruit ziet. Waar we op internet tegen aan lopen en wie en wat er op ons pad komt, wordt geregistreerd door algoritmes. En doordat de digitale wereld dankzij de smartphone verder en verder vermengt raak
