Diatoms: the secret food of the water cycle

*Diatomeeën: het geheime voedingsmiddel van de watercyclus*

## Project Information (EN)

In this testing facility, The Weather Makers built six big tanks in which diatoms can grow freely. Water from a nearby water gully flows through the tanks. Within these cylinders, they create the perfect conditions to stimulate diatom growth. As a big

## Projectinformatie (NL)

In deze testopstelling hebben The Weather Makers zes grote tanks gebouwd waarin we diatomeeën kweken. Ze nemen water uit een nabijgelegen sloot en laten het door de tanks stromen. Ze zorgen voor de optimale leefomgeving om de diatomeeën te laten groeien.
