

POND

Energy from microbes

Wateren als circulaire elektriciteitscentrale

Project Information (EN)

Nova Innova (a creative studio which combines nature, science and design to create sustainable applications) created the POND network. What would be more beautiful then generating electricity from a collaboration with living organisms? POND generates ener

Projectinformatie (NL)

Wat is er mooier dan elektriciteit verkrijgen uit de samenwerking met levende organismes? POND gegenereerd energie uit water dankzij de Microbial Fuel Cell technologie. Simpel gezegd is dit energie afkomstig van microben. Microben breken organisch materia
