

L'écoucheur

Exploring the raw linen fiber

Project Information (EN)

While growing and being scutched in Europe, 80% of flax nowadays has to be exported to China to be combed, spun and weaved before being reimported. This economical situation contradicts the sustainable growth of the fiber and its local culture. By working

Projectinformatie (NL)

While growing and being scutched in Europe, 80% of flax nowadays has to be exported to China to be combed, spun and weaved before being reimported. This economical situation contradicts the sustainable growth of the fiber and its local culture. By working
