

°Packing up PFAS

From polluted soil to clean bricks.

From PFAS polluted soil to clean bricks- the material and design research °Packing up PFAS offers a solution to clean up the dirty 'forever chemicals'

Project Information (EN)

Last year, when PFAS was put on the political agenda, it shut down the building sector of The Netherlands. The majority of Dutch soil tested positive. Techniques to clean the soil are being developed but since PFAS has one of the strongest chemical bonds

Projectinformatie (NL)

Last year, when PFAS was put on the political agenda, it shut down the building sector of The Netherlands. The majority of Dutch soil tested positive. Techniques to clean the soil are being developed but since PFAS has one of the strongest chemical bonds
